Abstract:
The work carries out a bibliometric analysis of De Computis, A Spanish Journal of Accounting History. To this end, we analyze a set of 152 articles published between 2004 and 2017. The analysis contributes to the previous literature in two aspects. First, by looking at the patterns and trends in scientific production in Accounting History related to Theme, Methodology, Authorship, Language, Institutional, and Country Affiliation. And Secondly, using citation analysis we analyze the impact in the international academic community of the articles published in the journal.
